

Automated & Dynamic Financial Modeling, Right in Excel

Rapidly generate investor-grade financial models for capital budgeting, company valuation, and project finance. Alt-Invest X builds customized structures, verifies every formula, and delivers ready-to-use templates — you just input your data.

Stop wasting valuable time on manual formula linking, exhaustive error-checking, and tedious layout design. Our solution automates the precision-critical work, freeing you to focus on strategic analysis and forecasting. What takes seasoned professionals days to complete, Alt-Invest X delivers as an audit-ready financial model in minutes.

"Given that Alt-Invest Computer Program is based on MS Excel gives it an added advantage in being a user friendly and comprehensive financial modelling software, which has greatly facilitated the work of our project teams in delivering quality financial models within a reasonable timeframe, mutually benefiting TAG-Value and its clients."

Malik Hamdan
Executive Valuation Director
Abu-Ghazaleh Valuation Co. (TAG-Value)

KEY FEATURES

Fast Track to Results

Build investor-grade financial models in minutes. Automatically generate comprehensive models for any project or business, eliminating lengthy manual setup.

Customizable Templates

We offer rich starter templates, fully customizable through our powerful configurator. Adapt your model dynamically as requirements change, from drivers to reporting, without manual formula editing.

Error-Free Formulas

Tired of spreadsheet errors? Our system automatically generates and links every formula, eradicating manual entry mistakes. Ensure paramount accuracy across thousands of cells, effortlessly.

Accurate Financial Reports

Access reliable financial reports and ratios. Built on deep expertise, our models consistently meet the high standards of investors and financial institutions.

Multiple Formats for Any Data

Tailor your model perfectly to your unique business drivers. Our versatile formats effortlessly fit any industry, scale, or project type — industrial, service-oriented, small, or large.

Transparency and Readability

Models designed for investors. Our program ensures optimal clarity with clean formatting, intuitive formulas, and adherence to international standards for effortless review.

HOW IT WORKS

1. Open Alt-Invest X tab in Excel, click “Create a Model” and choose a template that best fits your needs.

2. Adjust the planning step and duration to tailor the model to your project’s timeline.

3. Populate the tables with items that align with your plan. We have a choice of formats for every item you need in the model, so you can add various drivers and parameters.

4. You now have a **ready Excel model**. Simply fill in the input parameters specific to your project.

| Azithromycin | | | | | |
|-------------------------------|------------|-----|------------|------------|--|
| capacity and utilization rate | 200 | pcs | 30% | 50% | |
| unit sales per period | pcs | pcs | 60 | 100 | |
| price | 120 000,00 | Rs. | 120 000,00 | 120 488,89 | |
| sales | | Rs. | 7 200 000 | 12 048 889 | |

Feel free to customize it, add your own reports and charts, and share it with investors.

5. At any point, you can open Alt-Invest X configurator to **reshape** the model, adding or removing items as needed.

EXPANDED COMPATIBILITY

Need models for Google Sheets or Mac Numbers? Your package includes a standalone Alt-Invest X application that allows you to generate comprehensive models for these and other leading spreadsheet platforms, without needing MS Excel.
